I. OPEN DISASTERS/EMERGENCIES: NSTR

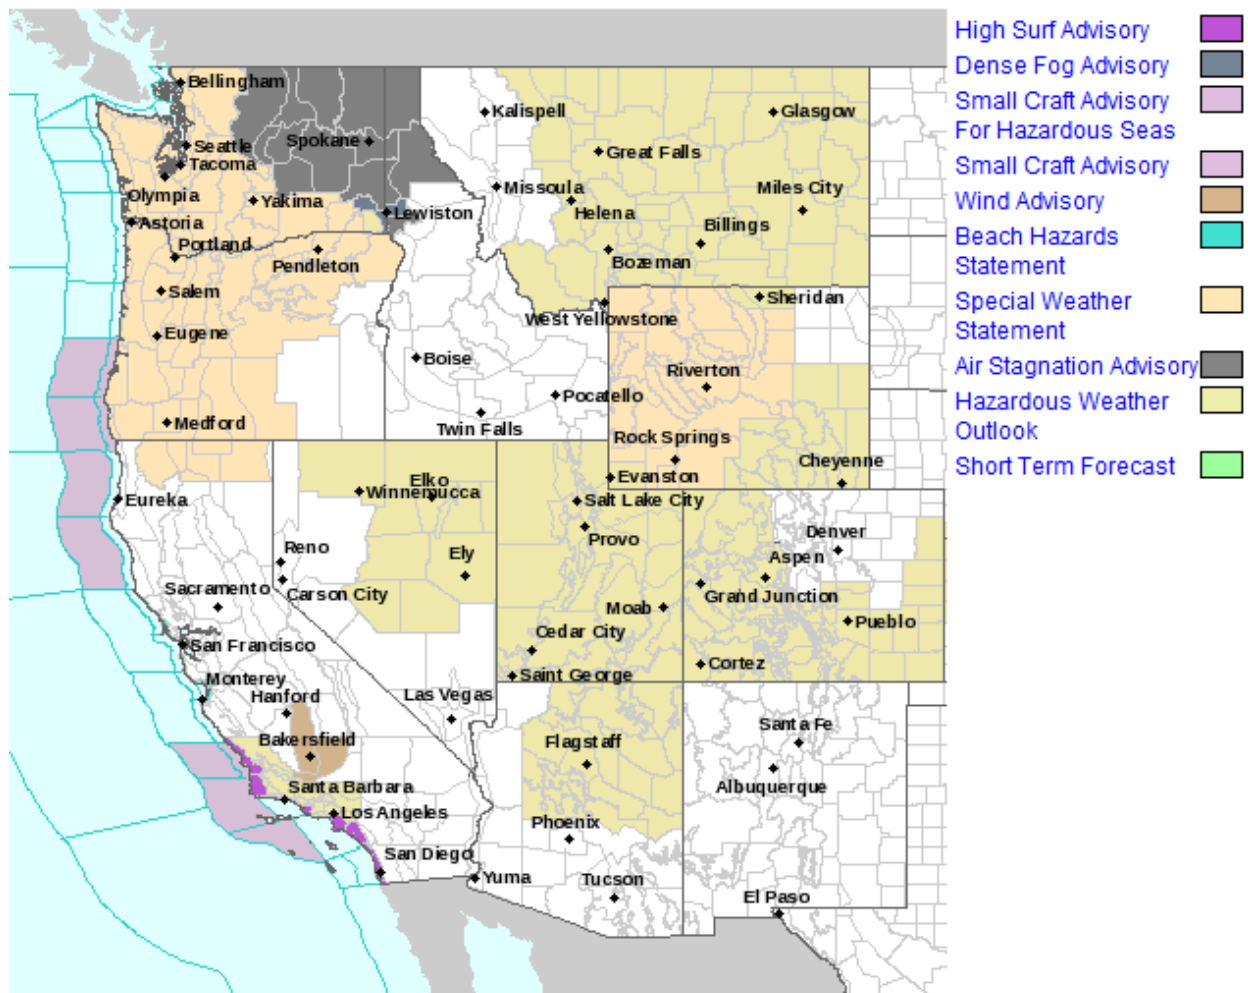

II. WEATHER:

Northern California – Fairly dry weather with above normal daytime highs for Thanksgiving except for just a slight chance of mountain showers over Yosemite and southward. Dry, warm

weather is forecast through the weekend, but a colder system may bring a chance of precipitation early next week.

Southern California – A low will bring below normal temperatures into Friday with possible precipitation from Thanksgiving night to Friday. High pressure and offshore flow will bring above normal temperatures over the weekend. For early next week, cooler and unsettled weather will return as low pressure drops into the Great Basin with the possibility of some showers Tuesday and Wednesday.

III. FIRES:

Overall Fire Risk:

Northern California

Medium to larger dead fuels are still generally below typical moisture values for late November due to the ongoing drought, although they are currently still holding onto some of the latest storm moisture from last week. Smaller dead fuels and dry to dormant live fuels became quite dry again in lower elevations of South Western region of Northern California late last week, in the very windy and very dry post-frontal environment. However, the air mass is now beginning to moisten, so those lighter fuels are moderating upward somewhat. Also lower elevation annual grasses are starting to locally grow again.

Southern California

There will be little or no fire activity across the region through the forecast period.

Preparedness Levels:

National Preparedness Level 1

Northern California

Preparedness Level 1 Multi-Agency Coordination System MACS Mode 2

Southern California
